PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Session Procedures Report (S/NF/SK)

PROJECT NUMBER: 8711

SESSION NUMBER: 2

DATE OF SESSION: 24 JULY 87

TARGET COUNTRY: IRAN

REFERENCE:

MISSION STATUS:

TECHNIQUE UTILIZED: CRV

SOURCE IDENTIFIER: 011

1. (S/NF/SK) Monitor Tasking: Identify and describe the placement and

SG1A

2. (S/NF/SK) Source Tasking:

- Describe what the "cavern" has been used for in the early 1900's

- Fix its position on an overlay trace of the area

3. (S/NF/SK) Summary: Site has a long history of being used to cache supplies. (See source sketch for relative position of the cavern).

4. (S/NF/SK) Comments: Monitor is confident regarding this data.

4 1/2 - a part of this complex has been used since ancient times for the same purpose. In more modern times it has been enlarged and expanded. It is in a strategic location. Its main function is to hide supplies. It is along a major supply route.

4½ - This underground facility is well concealed by the natural ravines and rugged terrain. The opening to this complex is large, natural, and is like a large cave entrance. It cannot be seen from the open ground leading to it because it is hidden by a canyon or ravine. It is ~~very~~ difficult to see from overhead because it is concealed in the hillside. On the inside is a large natural cavern that has been used in ancient times as a military storage point. In more recent times a large rectangular room/warehouse has been carved out of the rock beyond or adjacent to the cavern area. This location lies along an important supply route that has been used from ancient times to the present.
